

**Arc Shopping Centre**  
Bury St Edmunds

**Manufacture and Supply of External Doors, Windows, Louvre Panels and Feature Trusses. A particularly challenging job which took approximately twelve months to complete in manufacture.**

As you walk around the new Shopping Centre built on the old livestock market you can't help but notice the impressive feature trusses and Louvre Panels which are the architectural signature of this project.

Coulson Joinery set up a dedicated workshop to manufacture the Joinery on this project. Engineered work stations were designed and developed in order to produce the complex curved louvers which along with the Debenhams building are the focal point of the shopping centre.

Pressure impregnated softwood from sustainable sources was used throughout.

**Key facts:**

Client:  
**St Edmundsbury  
Borough Council**

Main contractor:  
**Taylor Woodrow**

Value:  
**£466,000**
