34 weeks

Brief Description:
**Phased delivery of
bespoke gable windows
and arched doors and
screens**

Our aim is to be the contractor of choice for all our clients and continue to build positive relationships by delivering excellence

Project Description

The vision for the project was to create a modern, spacious dining hall, complemented by a bright and inviting reception area that would enhance the visitor experience. The design embraced contemporary aesthetics while respecting the school's heritage, incorporating bespoke architectural features that added character and uniqueness to the space. Natural light was a key element, flooding the dining hall to create a warm and uplifting atmosphere for daily use.

The project had many complex design elements. Coulson Joinery played a pivotal role in overcoming these challenges, showcasing exceptional craftsmanship and technical expertise. Our work included the creation of triangular gable windows and arched internal and external doors, as well as bespoke timber pieces. All these bespoke joinery elements were manufactured from Accoya and clad in aluminium for durability and elegance. Among the standout features was a matching aluminium clad fire door, which had to be produced and tested to meet stringent certification and installation requirements—a truly unique achievement.

The completed project has transformed the school's dining facilities into a state-of-the-art space that promotes social interaction and community engagement. The new reception area provides a warm and welcoming entrance, while the dining hall offers a modern serving area and comfortable seating for students. This project stands as a testament to Coulson Joinery's ability to deliver complex, high-quality solutions in challenging environments, and to the craftsmanship of Coulson Joinery in bringing distinctive design elements to life.
